

GIORGI UBIRIA

Full Stack Developer

☎ +995 551 002 206 ✉ ubiriagiorgi8@gmail.com 🌐 @GiorgiUbiria 🌐 giorgiubiria-cv.netlify.app

PROFESSIONAL SUMMARY

Full Stack Developer with 3 years of experience building robust web applications across modern JavaScript and PHP stacks. Proficient in designing RESTful APIs, managing relational databases, and developing responsive, maintainable frontends with frameworks like React and Vue. Focused on clean architecture, performance, and solving real-world problems. Eager to continuously learn, experiment with new technologies, and improve both technical and system design skills.

TECHNICAL EXPERTISE

- **Frontend:** React.js, Next.js, Svelte, TypeScript, JavaScript (ES6+), HTML5, CSS3/SASS, Tailwind CSS, ShadCN, PWA Development
- **Backend:** Laravel (PHP), Nest.JS/Express (Node.js), Golang, RESTful APIs, GraphQL, Microservices Architecture
- **DevOps & Cloud:** AWS/Cloudflare (EC2, S3, Lambda, R2), GCloud, Docker, Nginx, CI/CD (GitHub Actions, Husky)
- **Databases:** MySQL, PostgreSQL, SQLite, MongoDB, Redis
- **Tools & Methodologies:** Git, Jira, Prometheus
- **Integration:** 1C Enterprise, Stripe, Third-party APIs, Real-time Communication (WebSockets)

PROFESSIONAL EXPERIENCE

Gorgia

2024 – 2025

Full Stack Developer

- Designed and developed an enterprise-grade CRM/ERM platform using Laravel and React, supporting over 400 concurrent users.
- Delivered a Progressive Web App (PWA) with offline functionality for both mobile and desktop environments.
- Engineered a real-time messaging system with WebSocket support, handling 1,000+ concurrent connections seamlessly.
- Contributed to a GPS tracking microservice leveraging PostgreSQL spatial features, processing over 10,000 location updates daily.
- Integrated 1C Enterprise ERP via REST APIs to automate financial data synchronization within the ERM.
- Collaborated with a cross-functional team to build a React-based frontend for an email analytics platform.

Giant Auto Import

2024

Freelance Full Stack Developer

- Built a car auction tracking platform with Next.js, including an admin panel for vehicle lifecycle management.

- Automated invoice generation with PDF exports and email notifications using background job queues.
- Developed a dynamic mailing system featuring a template engine and delivery tracking.
- Integrated multiple auction house APIs to enable real-time vehicle data synchronization.

PR Wave

2022 – 2023

Freelance Web Developer

- Developed a modern, responsive personal portfolio and blog using Astro.js and React.
- Implemented a lightweight CMS with markdown support and SEO-optimized architecture.
- Built a custom blog engine with category management, full-text search, and social sharing.
- Achieved a 95+ Google PageSpeed score through performance tuning and frontend optimization.

MS Georgian Partners

2022 – 2023

Full Stack Developer

- Developed and maintained MyServis, an e-commerce platform for service listings and sales using legacy PHP and jQuery.
- Created and led a development team for several months, coordinating project deliverables and mentoring junior developers.
- Worked extensively with legacy PHP codebase, implementing new features and maintaining existing functionality.
- Managed code reviews and established development workflows within the team to ensure code quality and consistency.

EDUCATION

International Black Sea University (IBSU)

2021 - 2025

Bachelor of Science in Computer Science

GPA: 3.6/4.0

Coursework: Data Structures & Algorithms, Software Engineering, Database Systems, Computer Networks, Web Development, System Design, Object-Oriented Programming

LANGUAGES

- **Georgian:** Native
- **English:** C1 - Advanced Proficiency
- **Russian:** B2 - Upper Intermediate

PROJECTS

- **CRM Gorgia:** crm.gorgia.ge – Enterprise-grade CRM/ERM platform featuring employee management, customer relationship workflows, and integration with 1C. (*Access restricted to company IPs*)
- **FromGorgia:** from.gorgia.ge – Frontend system for mail tracking, offering real-time package monitoring and updates. (*Access restricted to company IPs*)
- **Merch Gorgia:** merch.gorgia.ge – Merchandising and inventory management platform focused on product placement and stock optimization. (*Access restricted to company IPs*)
- **GiantAutoImport:** www.giantautoimport.com – Vehicle tracking and management system with auction data integration and status updates.

- **PRWave:** ornate-moonbeam-c5e191.netlify.app/blog – Personal portfolio and blog platform with an integrated CMS. *(Not currently used by the company)*
- **MyServis:** myservis.ge – E-commerce platform for service listings and sales. *(Primarily used outside the country)*
- **Finance Tracker:** finance-management-platform.vercel.app – Personal finance tool for tracking expenses, with built-in analytics and reporting features.
- **F.Conv:** fdotconv.vercel.app – Web-based file format converter. *(Currently requires re-deployment to a VPS)*
- **GreenLight API:** github.com/GiorgiUbiria/GreenLight-API – RESTful movie API built with Go, designed for performance and simplicity.
- **Quiz Generator Web Extension:** github.com/StarFleet1334/QuizGeneratorWebExtension – AI-powered browser extension for generating quizzes from web content. Built with a multi-service architecture using Spring Boot (Java), FastAPI (Python), and a JavaScript-based frontend. Developed in collaboration with a close colleague. Features include real-time quiz interaction, AI-based question generation, user tracking, and content summarization.

CONTINUOUS LEARNING

- Advanced cloud architecture patterns and microservices design
- Machine learning integration in web applications (Bachelor's Thesis)
- Enterprise system design and architecture patterns
- Exploring C# and .NET ecosystem for backend development
- Exploring Golang ecosystem for backend development
