Giorgi Ubiria, Software Engineer

Full-Stack Web Developer with over 6 months of professional experience and 3 years of total experience, skilled in both Front-End and Back-End development. Proficient in DevOps principles and cloud technologies. Highly adaptable, with a passion for solving complex problems and delivering user-friendly web solutions. Experienced in both freelancing and collaborative team environments. Eager to contribute expertise to a Software Engineer role and build innovative, high-impact web applications.

Employment History

Full-Stack Web Developer at Giant Auto Import, Tbilisi

June 2024 — September 2024

Designed and developed a comprehensive web application for managing car imports, including features for car registration, shipping calculations, and data management. Implemented custom solutions for dynamic car import tables, real-time shipping cost estimation, and user interactions. Utilized modern web technologies and frameworks to ensure a responsive and efficient user experience.

Full-Stack Web Developer at MS Georgian Partners, Tbilisi

February 2023 — June 2023

Led a team of developers to customize a premade website template, adding functionality to convert it into a fully operational e-commerce platform. Quickly adapted to PHP despite no prior experience, contributing to backend integration. Left the project during the rewrite phase due to personal reasons.
